It should be noted that another Toronto X-bander, CHHA, is very common here thanks to its much higher power and almost-clear channel 1610. Not so the third, CHTO 1690 in Greek (Glenn Hauser, OK, WOR)

** GERMANY. 3955, March 16 at 1805, `Uncle Bill`s Melting Pot`, monthly via Channel 292, playing what else, Irish music, S9+10/15 into UTwente; co-timed with Met Opera`s Fidelio. 3955 seems to have slight

CCI, unknown what. Much better on // 9670 S9+20. 1810 tribute to Roberta Flack, with ``Killing Me Softly``, a beautiful song, but I`ve always found that title/expression repulsive! 1815 to main music: Corsica, very nice. 1900 into Radio Six International, Scotland (Glenn Hauser, OK, WOR)

** MEXICO. 660 kHz, UT Monday March 17 at 0431 ``Nuevo León en La Hora Nacional``, so it`s the regional/stateish cutaway from the ``national`` hour, ergo on this frequency it`s XEFZ Monterrey. ** MEXICO [and non]. 1549.82, March 13 at 0507 UT, into Querétaro SDR, songs in English from some UStation, but also het on low side JBA --- and JBV on the waterfall when enlarged. Much too weak to pull any mod from it even by LSB tuning. By 0557 it`s a bit louder and sharper. At 0611 direct, same het/signal JBA on 1549.82.

Now I`m also intrigued by the 1550.0 UStation, as most of them except very far ones, run under 100 watts at night, even in the single digits, allegedly. 1550 ran thru 0600, no ID at 0602 but another song.

Daytime at 1645 UT March 13 into Qro SDR there is a weak line on 1550 as about -16 Hz, but inaudible.

BTW, IRCA Mexican Log 2024 showed two more on 1550, both CPs and presumably not yet on air, XECCAW in Jalisco, XECSGC in QRoo (Glenn Hauser, OK, WOR)

Replies to my earlier report:

``Glenn, at a check around 0515 UT March 13 no sign of XEPPM Radio Educación on 6185 here in Houston. I recall two previous outages lasted a couple of weeks. At least Canada’s last SW broadcaster CFRX still audible on 6070 at the same hour. Stephen Luce, Houston, Texas``

``Days of Hard Life by Lace from YHWH Pirate Station Opening
Nelson Ogden 648 subscribers 1,287 views Oct 14, *2016*

Here is the opening to one of YHWH's shortwave broadcasts. I recorded this from WBCQ's board feed online (not off air) for best sound quality. YHWH used to be a pirate broadcaster, but after being busted by the FCC, no longer operates. He did, however, run two specials on WBCQ 7490 kHz. This is the opening to one of them.

The host has previously quoted this song as "Days of Hard Life" by Lace. The only Lace I can find is a country and western band. This is certainly not their music. In fact, it sounds like it might not even be professionally produced. If it is done by amateur musicians, it is very good, but it just doesn't quite sound professional. Its {sic} not perfectly in time, vocals are very bright and harsh. There is heavy compression, but that's probably from WBCQ's audio processor.

I uploaded this for those that are interested in hearing a good quality version of this song. I'm not too interested in YHWH's message.`` (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 7475, March 15 at 0614, JBA carrier direct, presumed Station YHWH running late again, and nothing else scheduled.

Re Station YHWH report with the YT of ``Days of Hard Life``, Rick Barton, AZ, replies: ``I had corresponded with the op sometime back and he wrote that the song was actually recorded under the pseudonym "Lace" by himself and his (then) wife. He sent me a CD that had it and  few other songs they did at the time. best``

And Yahoo mail has this great new AI thing, summarizing what`s in emails, and gets this TOTALLY WRONG WRONG WRONG WRONG WRONG WRONG:

``- Rick in Arizona -- Rick acknowledges your correspondence regarding the song 'Lace' by Glenn Hauser and confirms that it was indeed recorded under the pseudonym 'Lace' by Glenn Hauser and his wife. Created by Yahoo Mail. Was this helpful?`` DAMN NOT, GO AWAY!!!! WRONG, WRONG, WRONG, WRONG. Are others getting these intrusions?? (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 7475, re Station YHWH: ``I had corresponded with the op sometime back and he wrote that the song was actually recorded under the pseudonym "Lace" by himself and his (then) wife. ** NORTH AMERICA. 11529.9, it seems we won`t be hearing ex-`Hikari FM` on SW. FYI:

``[WOR] Pirate on 11529.9 kHz. (formerly Hikari FM) to leave SW, in favor of MW (1710 kHz.) -- Hi Glenn - Here is my latest (March 14) correspondence from Ivan, the operator of 1710 kHz. I will miss chasing his SW signal to hear his unique musical selections. Ron Howard (Monterey, Calif.)

"Yeah I do not think I should do 11530 anymore and should focus on 1710 kHz. It seems like it is possible to reach your area at night if I dedicate the resources to it. On top of that I am getting attention locally on 1710 kHz. It can be heard 24 kilometers away during the day and that is just with 25 watts. However, as soon as I get a decent signal out, I will move away from 1710 so that I do not have to deal

with XEPE {1700} which is strong in your area. I will let you know once I do that.

The shortwave transmitter just kind of sucks as compared to the MW transmitter, it is more powerful but the modulator is sensitive and just kind of junk. But class G can be just as efficient as class D, it is just bulkier. I think going forward the plan will be to disassemble the shortwave antenna and use the wire from it to make the inverted L longer and shrink the loading coil. Then I can build a 100 watt class G MW transmitter and will be getting a decently strong signal into your area at night. You can listen in your car, lol, you cannot do that on shortwave {sic}. My hope with 11530 was to reach Asia, but I do not think I can do that with what I have at the moment, I need a directional antenna which is not feasible to put up here.

So you can forget about 11530 at this point in time. I am not going to be on it for a while and by the time I will get the idea to try again it will be with a different transmitter and probably in a different location. Last time I tried MW, I failed (I was dumb and didn't use single core wire for the antenna) but this time I am getting out at night so I think It will be better to do it instead. Kind of like killing two birds with one stone here, I get nighttime coverage and local coverage which average people can listen to. Maybe getting into British Columbia is not an option but I think I will reach more people this way. Very Best Regards."`` (via Ron Howard, WOR iog)

``1710 is a non-starter in BC (coastal) as the channel is totally dominated by Travis AFB. He needs to consider another channel. Perhaps just outside of the MW band --- 1720? 73, Walt Salmaniw`` (via Glenn Hauser, WOR)

** OKLAHOMA. 780, March 14 at 2035 UT, KSPI Stillwater is OFF the air. There are high winds and wildfires all over OK but I have not seen one close to Stillwater. OKC TV stations are in wall-to-wall coverage all afternoon (Glenn Hauser, Enid, WOR)

** OKLAHOMA [and non]. 780, March 14 at 2211 UT, KSPI Stillwater is still off the air. Now I`m bandscanning on caradio with less noise than in the house, yet more than usual in the garage. Shortly after my previous report, circa 2200 UT I saw a notice on TV coverage of the wildfires, that part of Stillwater was being evacuated! 93.9, KSPI-FM however is still on air at 2218, separately programmed anyway and I can`t tell whether the mere translator of 780 on 94.3 be on the air. What else? By next check 1540 UT March 15, 780 is back on the air.

Only other semi-local AM signal missing is 1120, KETU Catoosa [Tulsa]. By next check 1540 UT March 15, 1120 is back on the air. There were lots of power outages even unto areas not directly fire-threatened.

690, KGGF Coffeyville KS, almost in OK, is VG as usual, reporting about power outages.

860, KKOW Pittsburg KS, almost in OK too, is JBA, despite 10 kW like KGGF. It`s always somewhat weaker due to higher frequency, but maybe underpowered now. At 2212 heard them mention 97.5, their mere translator, and thought I heard previous callsign KOAM, but maybe I was dreamagining that.

101.9, KTST OKC allowed itself to be interrupted at 2219 by a fire warning concerning north Lincoln County. Did not hear that on any other station, but couldn`t check all of them in time.

91.7, KOSU Stillwater still very much on the air with fire coverage from some TV station pre-empting NPR ATC at 2217.

91.5, gospel huxter in Kansas with big hum and seems mono, at 2217. That`s KSNS Medicine Lodge, almost in OK. Same defect a few days ago as I tuned across. Some months ago we had reports about it being for sale, by locals, tho owned by `Florida Public Radio`. Haven`t kept up with any further news about that. This nothing to do with the wildfires (Glenn Hauser, OK, WOR)

** OKLAHOMA. 1210, March 17 before 0500 UT, strong talk station, 0503 ``5 states, KGYN`` so Guymon is again failing to aim away from us, take that!, WPHT (Glenn Hauser, OK, WOR)

** OKLAHOMA. 162.475 MHz, WXL48, Enid Weather Radio we can now monitor conveniently as channel 4 on the weather band of our new C Crane Skywave SSB2. KFOR/NBC, KWTV/CBS and KOCO/ABC all blew away their network news at 2230 UT March 14; KWTV did have some time for commercials during the emergency. It and KOCO went back to networx for prime time from 0000 UT March 15, but KFOR kept on wildfire coverage until 0100. KOKH/Fox wasn`t doing much at all, as who needs it? Our sky all afternoon was orange/yellow from all the blowing dust and smoke. A far cry from the absolutely clear view of the Total Lunar Eclipse last night. High winds also caused lots of power outages, but so far not for us (Glenn Hauser, Enid, WOR)

** ROMANIA. 9510, March 17 at 0453, S9+30/40 of folk music, from RRI English for western N America.

Tentative A25 schedule from March 30; Wolfgang Bueschel excerpted from HFCC and gh picked out English only; all shifting one UT hour earlier due to irrelevant DST in Europe, so this will be at 0300 on 9740, 11620:

With CIRAF target zone, kW, azimuth, [no] slew, antenna type.

GAL = Galbeni site, TIG = Tsiganeshti site.

** U S A [non]. DOGE criminals have reportedly hit USAGM, starting to close various subsidiary services, before VOA: March 15 at 1836, VOA French still going VG on 15730 BOTSWANA S9+25/30, and at 1841, 12075 via VATICAN, violating Separation Of Church And State. VOA English still going at 1837 on 15580 BOTSWANA; VOA Amharic at 1839 still going via KUWAIT on 13765; all checked via UTwente. Some other VOA languages have been replaced by music, if still on the air, as well as R. Ashna, and Deewa per Jose Jacob. See this:
VOA STAFF PUT ON LEAVE AFTER TRUMP ORDERS CUTS, by Nathan Layne:
https://www.reuters.com/business/media-telecom/trump-signs-order-gut-voice-america-other-agencies-2025-03-15/
(Glenn Hauser, OK, WOR)

** U S A [and non]. VOA situation: Not all the staff at Greenville

[Grimesland] are full-time employees; seven technicians are personal service contractors (PSC) and are to be put on administrative leave until further notice, but not locked out, unlike some personnel in Washington.

Five Government Service Employees remaining are: three supervisors, the chief engineer and a secretary. One person already accepted a buy-out. A former manager has returned. It`s unclear if there will be enough staff to keep running the site 24/7.

Perhaps they will at least keep Radio Martí broadcasting as long as the program feed remains. It seems there has been a lot of repetition already in music and talk features to fill the 24-hour schedule.

Already planned: GB-8, a 500 kW AEG transmitter is to be retired, as no high voltage transformer can be obtained for it. One of the Kuwait senders, a Continental 417 will be moved in to replace it.

Now in doubt is a major expansion of the Kuwait site, three x 250 kW Ampegons, to replace São Tomé, and others. Other relay sites? So far it appears that Tinang, Philippines is still operating (Glenn Hauser, 0451 UT March 16, WOR)

** U S A [and non]. Monitoring by gh: 13820, March 16 at 1457, open carrier S6/S7, 1500 JIP Radio Martí with ID. 11860 was not on at 1457 but is on after 1500. 11930 already running at 1457, S7/9+5, all Grimesland NC site. Presumably about to be abolished.

Greenville manager Willford Cooper could not find anything out at 1604 UT March 16. The computer network was down and Greenville getting its Martí programs from satellite. Staff could not put in their time cards, get the daily activity report of operational memos from DC. So if they had been told to shut down they would never know.

But by 1654 UT: The order has been passed to Macon Dail, the Chief Engineer, to shut Greenville down. All employees have been told not to show up for work.

Alan Furst, Kansas City, reports: ``Martí went off at 16:30 today 3/16.  All transmitters appear to be off in 22 and 25 meters. It happened abruptly, although I wasn't listening closely to know what they said at the end. Was a surprise.``

Many USAGM services are missing frequencies, dead air, filling with music or repeating old programming as the axe is falling; much monitoring of details in the WOR indian ocean group. The White House has quoted Dan Robinson`s critique of VOA as one justification. And Kim Elliott says, ``The zombification of VOA has begun. Listening at 0400 UTC 15 March on 4930 kHz, Botswana relay via an SDR in South Africa: It was the VOA "Worldwide in Five" newscast from March 9 at 0200 UTC.`` - he probably meant 0400 UT 16 March as this was posted a few minutes after that.

VOA`s broadcasting of week-olds eclipses Voice of Turkey, where their olds would be no more than 14.5 hours stale.

At 1900 UT March 16, via UTwente checking all VOA scheduled frequencies per EiBi:
Tigrigna: 9485 BOT & 12040 CVA dead air; 13765 KWT music
English: 13590 D-L = Germany music
French: 17700 GB OFF
Korean: 7465 & 9800 PHT, 9575 THA all with music
(Glenn Hauser, OK, WOR)

** U S A [and non]. 4930, March 17 at 0444, JBA carrier, no doubt VOA

BOTSWANA relay still on air, but others report no new programming, and site expected to be closed down later this date.

9775, March 17 at 0455, S7/S9 of music with long pause between tunes, presumably fill music, off by 0459: VOA English BOTSWANA scheduled 0300-0500, still running while HQ in Washington is locked up.

Various other relay sites are affected, MW and SW, disappearing from air, replacing with other programming, etc., everyone trying to keep up with this fast-breaking situation, reporting to the WOR iog. Of course this also threatens innocent bystations using USAGM facilities such as Radio Thailand, Pilipinas.

Greenville guys were told to shut the power off to the building. That means no A/C and no heat. In NC the equipment will be ruined in a month. It`s over for shortwave (Glenn Hauser, OK, WOR) See also CUBA [and non]

** U S A [and non]. WORLD OF RADIO 2286 monitoring: confirmed Saturday March 15 at 1928 about 4 minutes into so start circa 1928 UT on WA0RCR, 1860 AM, MO, S9+18 groundwave into nearby SDR.

Saturday March 15 at 2300, still no signal on WTWW, 9475, when WOR appeared a few times in A-24 season before 9475 became inoperable. Maybe to return?

UT Sunday March 16 at 0000, new non-time for WOR reconfirmed on WRMI 9955, preacher, instead of UT Sunday 0100, despite still on the don`t-you-believe-it System B sked for Saturday 8:00 PM EDT.

Confirmed UT Sunday March 16 at 0349 UT on WA0RCR, 1860 AM, MO, S9+20 groundwave into nearby SDR but with storm crashes from Alabama area, 5 minutes into so started circa 0344 the 0315v.

Also confirmed Sunday March 16 at 1047 the 1030 on WRMI 9955, S9 direct. (Also, after 0930, WRMI was still *not* on 9455, contrary to own sked, when WOR is supposedly aired on Saturdays.) Next:

** U S A [and non]. 5950, Sat Mar 15 at 2251 into UTwente, ham radio news in English, but with modulated pulse QRM once per second, horrible. Same thing audible without QRM from WRMI into Georgia SDR. Xmtr grid shows 5950 WRMI-10 does not start until 2300! Contradixion: System L sked shows 5950 WRMI starts at 2100 including `Viva Miami` at 2245. Something`s always odd at Okeechobee (Glenn Hauser, OK, WOR)

** U S A. 5950, Mon Mar 17 at 0618, WRMI still on with TOMBS, running a few words behind 5850. 5950 had been normally off at this hour. Xmtr grid shows until 0400 only, but System E shows weekends only also 0600-1500. Does Monday morning count as ``weekend``? And is there really a break 0400-0600? (Glenn Hauser, OK, WOR)

** U S A. 15138/15142/15146//15154/15158/15162/15166, March 16 at 1453, WMLK only S9/+10 on fundamental 15150 but manages to produce unstable spurs at +/- ~4 kHz intervals. Something`s bonkers at Bethel (Glenn Hauser, OK, WOR)

** U S A. 570, March 17 at 0631 UT, Sioux Falls ad, and plug for Alaska cruise with WNAXtrips.com, which converts to https://wnax.com/events/categories/trips/
Quite a sideline for a radio station, travel broker too, like WRMI. Where`s KLIF, or XEBJB? WNAX Yankton SD barely reaches here on daytime groundwave when KLIF is a problem (Glenn Hauser, Enid OK, WOR)

UNIDENTIFIED. 730, March 17 at 0634 UT, `The Other Side of Midnight`, rather than XEX or anything else. I`m running across this show more and more, but not among the `Shows and their Network Codes` on page 263 of the 2024 NRC AM Log; should be added. Originates at WABC, which provides huge podcast archive, https://wabcradio.com/podcast/the-other-side-of-midnight-with-frank-morano/ but I can`t find a mere affiliate list; is there one, anywhere? I would guess KQPN West Memphis AR, which is talk format per NRC AM Log, but website is about sports only. Also heard here is KKDA Grand Prairie TX in The Metroplex, but it`s Korean. TOSOM not to be confused with a book, movie of same name (Glenn Hauser, OK, WOR)

** U S A. 730, March 18 around 0630 UT, mixture none dominant, unlike last night with `The Other Side of Midnight` - Greg Hardison replies: ``Glenn: - "The Other Side Of Midnight" matches up on the KQPN webstream. I'd go with your own guess, as to the 730 unID. - the other G H`` i.e. West Memphis AR, 1 kW minor lobe to west; day pattern is NW/SE. An instance of `breaking main format`, sports, diversely to fill overnight (Glenn Hauser, OK, WOR)

** U S A. 780, March 15 at 0640 UT, WBBM with `StarDate` about Spica at its reliable time (Glenn Hauser, OK, WOR)

UNIDENTIFIED [and non]. 550, March 15 at 0634 UT and still at 0653, 1 kHz tone alternating with loop announcement, approx.: ``This is Westwood One, SES-11, transponder 17, for receiver authorization, please call Denver operations center, 720-873-5177 between 8 am and 10 pm eastern time``. Since when is Denver on EDT? Another instance of Eastern zone hegemony. Same thing I was hearing one week ago during the DST Hour Of Confusion, on WWL and at least tones on several other MW frequencies, but bandscan tonight does not find any others -- however, at 0644 there is dead air on 850 KOA and 870 WWL. 550 dominant signal is most likely KTRS St Louis MO; two Texans, KCRS and KTSA are unfavorable, and KFRM KS is low-powered at night (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 810.58 kHz, March 13 at 0612, JBA carrier still hetting 810.00 WHB (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 810.57, March 14 at 0710 UT, still het against 810.0 WHB stupid sports talk. Exact offset varies a little from one log to another (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 1030 kHz, March 15 at 0645 UT, romantic song in Spanish -- oops, the romance is with Jesus. Only two candidates in the NRC AM Log: KCWJ, Blue Springs MO, 500 watts at night and direxional thisaway; or 50 kW daytimer +limited hours KCTA Corpus Christi TX (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 1030 kHz, March 18 at 0645-0706+ UT, praise music in Spanish again tonight. I stay with it hoping for any announcement, even ToH ID, but none heard unless I dozed off. As on March 15, more likely KCWJ MO than KCTA TX (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 1030 kHz, March 19 in the 06/07 UT hour, nothing but continuous praise music in Spanish. Sounds like from a single performing group, song after song. Suspect KCWJ MO, Radio Vida. Radio-locator leads to the network website

https://radiovida.com/about/
which does not include any station on 1030! HQ is in Weslaco TX, so flagship is KRGE 1290. Also detailed program sched by day and time, https://radiovida.com/programacion/
no zone specified, but should we assume it be CDT = UT-5? Most outlets are in CT, but not all, and there are also in Argentina, Honduras, México. With some blanx and no consistency during the 1-2+ am hour, which might correlate with all the `fill` music I am hearing. Late at night I`m normally offline, but will have to try to match webstream. At 1700 UT, stream runs long string of IDs in English starting with KRGE but not the whole list as on website; did not catch KCWJ included. Are all stations taking the simultaneous network feed, possibly inserting local IDs?

How about KCTA 1030 Corpus Christi, 50 kW daytimer + limited hours depending on WBZ SR/SS but should never be on in the nightmiddle. Weekday program sked shows starting at 4 am CT = 09 UT, and final program starting at 8:32 pm = 0132 UT, so until 0200?? Entire program sked does not show a single title in Spanish, altho NRC AM Log classifies it as EE/SS:REL. That ``SS`` is the only reason I considered it a possibility, besides running overtime (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 1330, UT Mon Mar 17 at 0438 UT, hymn in English with chimes is dominating. Unseems my regular nearbie, KNSS Wichita, which is news/talk with far right extremists such as Hannity scheduled this hour. Too many other choices of REL/GOS formats with low power, bad direxionality (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 4790, March 17 at 0443, JBA carrier vs CODAR, intriguing since no broadcasters listed except an hour of ChiCom jamming at 1230 per EiBi; could be ute, but nothing on this exact frequency per Klingenfuß 2022. Not a third harmonic as 4+7+9 = 20, not a multiple of 3 (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 4950, March 17 at 0445, JBA carrier, much weaker than 4940- Venezuela. Nothing listed in EiBi, Aoki, or Klingenfuß; but could be 3 x 1650 or 5 x 990 or 9 x 550 (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 6882, March 17 at 0449, open carrier, pirate? None reported currently in HFU; years ago, MRI appeared here. Ute? Nothing on this exact frequency in Klingenfuß 2022 (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 7505, March 17 at 0451, JBA carrier; nothing but WRNO listed except 25 minutes of ChiCom jamming at 2335. WRNO sometimes runs much later than this; maybe Metairie merely excited? (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 9936.0 AM, March 15 at 0618 UT, S8/S9 open carrier except for clix, at the rate of 20/minute = every 3 seconds, JBA out to 9923/9950, +/- 13 or 14 kHz. What is this? Yet another one ending in -6 (Glenn Hauser, OK, WOR)
